

user	
PK	<u>user_id: INTEGER</u>
UK1	created: INTEGER
	oauth_key: TEXT
UK2	display_name: TEXT

The **user** entity is a persistent representation of a user who is (or has) signed in to the system using OpenID Connect/OAuth2.0. The attributes shown here make up a basic set that are either auto-generated (**user_id**, **created**) or obtained (at least initially) from the OAuth2.0 provider (**oauth_key**, **display_name**).
